08:30–10:00 Registration desk open in Forum Hall Forum Hall Foyer 2

10:00–11:00 Keynote opening session in Forum Hall

Renewables markets at a crossroads

Are voluntary renewable energy markets destined to fail?

This opening keynote session will establish the tone and standard for the conference's new approach to addressing the significant issues facing renewables markets. In this session, one group of speakers will argue that voluntary markets are already providing significant benefits to the energy transition, while another group will contend that only compliance mechanisms can create the rapid impact necessary for a successful switch to renewables. The moderator will summarise the debate and invite delegates to continue the discussion into the conference's first networking break.

Moderator:

Adam White, Secretary General, RECS Energy Certificate Association

Speakers include:

Aude Filippi, Director Business Development – Gas & Sustainability Markets, EEX Group

Luke Greicius, Senior Director for Policy, Insights & Markets, Xpansiv

Bart Mock, Managing Director, Caely Renewables

Sophie Casenave, Senior Public Affairs Director, STX Group

11:00–11:30 Coffee break in Forum Hall Foyer 2 Offered to you by 3Degrees

3Degrees®

11:30–12:30 Parallel session 2A in Forum Hall

Wired for impact

Bare minimum or game changer – strict annual matching?

Is the question of strict annual matching a distraction from larger and more urgent issues? Could it be a revolutionary change that helps bring balance to the EAC markets, particularly in Europe? In addition to engaging in a lively discussion, conference attendees will gain significant insights during this session, as speakers present arguments for each side of the debate and support their viewpoints with solid evidence.

Moderator:

Giuseppe Coppola, Head of Advisory, GO2 Markets

Speakers include:

Marie Christine Bluett, Independent Advisor, RECS Energy Certificate Association

Joni Vuorela, Green Trading Desk Manager, Fortum

Daniel Arnesson, Manager Renewable Power Certificates, Vest

Ivar Munch Clausen, Group Head of IT, Caely Group

11:30–12:30 Parallel session 2B in South Hall 2

Beyond renewable power

PoS, GO, national certificates, or something new to unite them all?

In the conference's first renewable gas session, delegates will hear from two sets of skilled speakers. They will debate the role of various biomethane certificate schemes and markets, or whether confusion undermines these markets, suggesting that we should instead opt for one 'super' certificate to cover all uses. Delegates will have the opportunity to learn about the expanding biomethane market and its potential future developments, both positive and negative.

Moderator:

Katrien Verwimp, Strategy Coordinator, Energy Certificates, Association Issuing Bodies (AIB)

Speakers include:

Tatiana Demeusy, Senior Manager Renewable Gases, EnBW

Kateryna Dolzhenko, Regulatory Affairs Manager Biomethane, Shell

Clara Jensen van Rensburg, Research Analyst – Environmental Commodity Markets, Caely Renewables

Gunnar Steck, Executive Advisor Wholesale Markets, Eurogas

12:30–14:00 Networking lunch buffet in Forum Hall Foyer 2 Offered to you by Xpansiv

Xpansiv®

14:00–15:00 Parallel session 3B in Forum Hall

Beyond renewable power

Biomethane use in electrifiable sectors – green gas or green power?

Should green gas be used for immediate benefits in transport and heating, or should it facilitate green electrification through biomethane power generation? Speakers in this session will examine the potential of both options by debating the merits and flaws of each approach. To engage delegates with their viewpoint, speakers will present informative and evidence-based points, followed by a summary from the moderator.

Moderator:

Martina Gabriel, Head of Guarantees of Origin and Clean Mobility Department, OTE

Speakers include:

Svetlana Bochkova, Senior Policy Manager, Eurogas
Tim Hamers, Secretary General, European Renewable Gas Registry (ERGaR)
Zvonko Ilic, Senior Originator for Biomethane, 3Degrees
Eunice Ribeiro, Senior Public Affairs Director, STX Group

14:00–15:00 Parallel session 3C in South Hall 2

Innovation or pipe dream?

The deliverability of renewable energy is important – or is it?

The question of deliverability plays an important role in the revision of international standards related to EACs. Some argue that to claim the use of renewable energy, it must fulfil certain conditions for deliverability. Others argue that the term “deliverability” is a misnomer that undermines book-and-claim systems and market principles. In this session, attendees will hear from excellent speakers representing both sides of the debate, and whether their views are challenged or reinforced, delegates will undoubtedly leave better informed.

Moderator:

Eva Klesse, Chief Sales Officer, KlimaInvest Green Concepts

Speakers include:

Devon Johnson, Policy Manager, Center for Resource Solutions
Magnús Þór Magnússon, Specialist Key Account Manager, Landsvirkjun
Eric O’Shaughnessy, Renewable Energy Research Analyst, Clean Kilowatts
Nicholas Fedson, Scope 2 Lead, Science Based Targets Initiative

15:00–15:30 Coffee break in Forum Hall Foyer 2 Offered to you by 3Degrees

3Degrees®

15:30–16:30 Parallel session 4A in South Hall 2

Wired for impact

EAC standards – are they worth the paper they are written on?

Considering the substantial effort involved in developing various international standards related to EACs, this question may seem unusual. On one hand, one could argue that major standards such as the Greenhouse Gas Protocol define the market’s role and impact. However, it can be argued that EAC markets are already mature and might overlook excessively stringent standards. Delegates will have the opportunity to form their own opinions after hearing experts present the arguments for each side.

Moderator:

Merve Güngör, Policy and Network Manager, RECS Energy Certificate Association

Speakers include:

Ivana Đurovič, Category Manager Renewable Energy, Knauf
Pedro Faria, Environmental Lead, EFRAG
Andrew Glumac, Head of Energy, CDP
Lukáš Pataky, Group Head of Procurement Energy, Wienerberger

15:30–16:30 Parallel session 4C in Forum Hall

Innovation or pipe dream?

Love location or marvel at markets – amicable or adversarial scope 2 accounting?

In this session, speakers will revisit the debate between market and location-based scope 2 accounting methods and discuss the role of dual reporting. Delegates will hear advocates for each position make a compelling case for their viewpoints, supported by experience and industry insight. By the end of the session, delegates will have the information and tools they need to continue the conversation throughout the conference and beyond.

Moderator:

Marina Kemper, Energy Tracking Consultant, Enunda

Speakers include:

Enam Akoetey-Eyiah, Independent Expert Consultant
Matthew Brander, Chair of Carbon Accounting, The University of Edinburgh’s Business School
Michael Gillenwater, Executive Director, The GHG Management Institute
Saptarshi Pal, Head of Origination Certs, Global Environmental Markets, Statkraft

17:00–17:30 Keynote session 5 in Forum Hall

Renewables markets at a crossroads

Support RECS for better EAC markets

To wrap up the first day of the conference, the RECS Board and Secretariat will reflect on the conference thus far, with a particular focus on the central theme of 'Now or Never – Renewables markets at a crossroads.' The RECS team will also update delegates on what the association has achieved in the past year, as well as the organisation's plans and objectives for the future. Most importantly, we will also take the opportunity to thank the conference's sponsors, without whom the event would not be possible. This high-level session concludes Day

1 of the conference and aims to generate plenty of topics for discussion during the evening's social events.

Speakers include:

Adam White, Secretary General, RECS Energy Certificate Association

Merve Güngör, Policy and Network Manager, RECS Energy Certificate Association

17:30–18:30 Networking drinks in Forum Hall Foyer 2 Offered to you by EEX Group

eex group

19:30–23:00 Buffet dinner party in Cevalny Jelen – Red Stag Restaurant
Offered to you by Caely Renewables

CAELY
Renewables

09:00–10:00 Parallel session 6A in Forum Hall

Wired for impact**Missing full consumption disclosure – partial coverage means partial impact**

Full consumption disclosure remains RECS' primary policy for advancing EAC markets to the next level. We have had a positive impact; Europe is home to several countries with full consumption disclosure, and many stakeholders have embraced this position as their own. However, we have not convinced everyone. Some still believe that full consumption disclosure goes too far and that EAC systems and markets should focus solely on renewables. Delegates will hear both this perspective and the alternative position that EAC markets are inherently limited without full consumption disclosure.

Moderator:

Dania Piccioli-Cappelli, Chief Investment Officer, Nvalue

Speakers include:

Rodolphe Schennen, Managing Director, Commerq
Emine Duygu Sisman, Head of Environmental Markets, EPEX Spot
Dirk van Evercooren, Managing Owner, 2DegNRG
Louis von Moos, Managing Director, Association ECS Switzerland

09:00–10:00 Parallel session 6B in South Hall 2

Beyond renewable power**Green, blue, yellow hydrogen – viable markets or marketing hype?**

The landscape for hydrogen can be complex and varied. Delegates attending this session will listen to knowledgeable speakers debate whether all zero and low-carbon hydrogen represents a step in the right direction or if only truly renewable hydrogen can aid the energy transition. The speakers in this session will seek to provide clarity while persuading delegates of the merits of their point of view.

Moderator:

Wael Almazeedi, CEO, Avance Labs (ME2X)

Speakers include:

Jared Braslawsky, Executive Director, The I-TRACK Foundation
Mary Polovtseva, Senior Energy Policy Analyst – Environmental Commodities, Veyt
James Critchfield, Head of Registry and Market Integrity, Clean Counts
Alexandra Popova, Policy Officer, e-NG Coalition

10:00–10:30 Coffee break in Forum Hall Foyer 2 Offered to you by 3Degrees

3Degrees®

10:30–11:30 Parallel session 7A in South Hall 2

Wired for impact**Subsidy push or demand pull – does the energy transition need more than EACs**

In this session, delegates will hear opposing opinions. Some expert speakers will make the case that only public support can effectively 'push' the delivery of more renewable energy. Others will argue that without consumer demand for renewables providing a market 'pull,' the transition would slow or stall. Delegates will have the opportunity to hear from both sides and decide which makes the more convincing argument, or whether the energy transition must maximise all tools in the interest of both people and the planet.

Moderator:

Emilie Tretow Busellato, Originator, Statkraft

Speakers include:

Jules Chuang, Co-founder and Director, Mt Stonegate
Mátyás Vajta, Chief Executive Officer, HUPX
Marina Sergeeva, Green Energy Strategist & Corporate PPA Principal Consultant, DNV
Nicholas O'Keeffe, Lead Portfolio Manager, Norlys Energy Trading

10:30–11:30 Parallel session 7C in Forum Hall

Innovation or pipe dream?**Years, months, hours – what level of EAC matching granularity is best?**

Revising international standards related to EACs has centred around the debate over accuracy and the question of EAC matching granularity. In this session, delegates will hear arguments for yearly or monthly matching as practical and effective options, as well as the case that hourly matching can best accelerate the energy transition. At the end of this timely session, everyone will leave with a better understanding of the pros and cons of each position.

Moderator:

Katrien Verwimp, Strategy Coordinator, Energy Certificates, Association Issuing Bodies (AIB)

Speakers include:

Ivan Debay, Founder and CEO, Origo
Kenneth Nelson, President, Blue Delta Energy
Eleonore Lazat, Commercial Director, Granular Energy
Juliane Mundt, Senior Manager, HIC Consulting

Session 7A is supported by HUPX

Bronze sponsor

The HUPX GO market was launched as a local market in June 2022, focusing on GOs related to Hungarian Feed-in-Tariff production for sale. By September, it had expanded into a pan-European organized GO market. This platform concentrates liquidity through auctions and provides the well-known standards of organized power markets: transparency, anonymity, reference prices, clearing and settlement, and guaranteed delivery. The market provides sound liquidity with a rapidly growing membership, currently around 70 members.

The organized GO market of HUPX, which facilitates the trading of GOs from any AIB country, offers the following characteristics:

- **5 Order attributes:** Preference handling via technology, production month, commission date, country, and support type
- **Available technologies:** Biogas, Biomass, Geothermal, Hydro, Landfill gas, Solar, Waste, Wind, and any other EECS-compliant technology
- **Available countries:** Hungary and other AIB countries
- **Seller side:** Hungarian and other European power plants and GO traders, including MAVIR, the Hungarian Transmission System Operator
- **Clearing and settlement:** Via HUPX technical GO account (MEKH and NECS registry accounts) and HUPX bank account
- **Guarantee system:** Guaranteed delivery via collaterals for buyers and sellers
- **Auction frequency:** Monthly auctions
- **Pricing mechanism:** Single clearing price set by the last winning buy order

Meeting sponsors

At Å Energi we are working together for a future based on renewable energy. We aim to generate even more renewable energy, distribute it efficiently around the grid, and make use of it in new and exciting electricity market services. Join us on our journey as we develop our business in Norway and the wider Nordic region.

Our most important social mission is to increase the production of clean, affordable renewable energy, to ensure that the electricity is distributed efficiently around our network, and to develop new and better energy-related services in Norway and the Nordic region – for our customers in rural and urban areas, industry and commerce, premises and homes. That is the only long-term, sustainable response to the energy crisis and the threat of climate change.

Å Energi at a glance

Our 70+ hydroplants produce 11,3TWh renewable energy every year and we have almost 600 000 customers across distribution and private households. We also deliver 20TWh renewable energy to the business market every year.

Visit www.aenergi.no/en

Granular Energy is the leading provider of energy and certificate management software for utilities. As consumers demand greater transparency into the source of their clean energy, Granular Energy helps utilities and suppliers develop and scale the next generation of carbon-free energy programs. Our end-to-end certificate management platform streamlines existing processes, reduces risk, and enables unprecedented transparency at the annual, monthly, daily or sub-hourly level. Our platform is used by over 30 utilities across 10 countries and is behind the world's largest 24/7 clean energy program in the world.

Visit www.granular-energy.com

STX

STX Group is a leading global environmental commodity trader and climate solutions provider. For over 25 years, our teams have continued to be at the forefront of the global transition towards a low-carbon economy. Leveraging our long-standing expertise in accurately pricing pollution and emissions, we help cultivate trust in market-based solutions to the decarbonized economy.

Our trading and corporate climate solutions offerings ensure capital flows to thousands of projects that make the world a greener place, while providing corporations with certified proof-points of their contributions to environmental progress. Headquartered in Amsterdam with offices worldwide, our global team, comprises of over 500 professionals of more than 50 nationalities.

Verbund

Verbund is Austria's leading electricity company and one of the largest producers of electricity from hydropower in Europe. Close to 100% of our electricity generation comes from climate-friendly, renewable hydropower. Ever since its founding as Österreichische Elektrizitätswirtschafts-AG in 1947, VERBUND has been co-shaping the future of energy: Even back then we set our sights on hydropower and, hence, renewable energy sources. Today, after more than seventy years, VERBUND is Austria's largest and climate-friendly electricity producer. Close to 100% of our electricity is generated from hydropower, supplemented by wind and thermal power.

Verbund is active in all steps of the value creation ladder: From electricity generation to electricity transmission to trading and sales. We are permanently working at innovative and sustainable solutions for customers in the private and business sectors in order to be able to react to changes.

Visit www.verbund.com

Media partner

argusmedia.com

Argus is the leading independent provider of market intelligence to the global energy and commodity markets. We offer essential price assessments, news, analytics, consulting services, data science tools and industry conferences to illuminate complex and opaque commodity markets. Headquartered in London with over 1,400 staff, Argus is an independent media organisation with 30 offices in the world's principal commodity trading hubs.

Companies, trading firms and governments in 160 countries around the world trust Argus data to make decisions, analyse situations, manage risk, facilitate trading and for long-term planning. Argus prices are used as trusted benchmarks around the world for pricing transportation, commodities and energy.

Founded in 1970, Argus remains a privately held UK-registered company owned by employee shareholders and global growth equity firm General Atlantic.
